# 6. Project Testing

Implement Client Script & UI Policy (Incident)

## Testing Objective

To verify that the configured UI Policy and Client Script work according to the expected requirements.

## Test Case 1

Condition: Incident Impact is 1-High.
Expected: UI Policy becomes active and configured field behavior is applied.
Result: Verified.

## Test Case 2

Condition: High Impact Incident.
Expected: Urgency follows the configured mandatory rule.
Result: Verified.

## Test Case 3

Action: Attempt State update through list editing.
Expected: Client Script prevents the unwanted update and displays the configured alert.
Result: Verified.

## Test Case 4

Record: INC0010003.
Expected: Incident values and configured rules can be checked during testing.
Result: Verified.

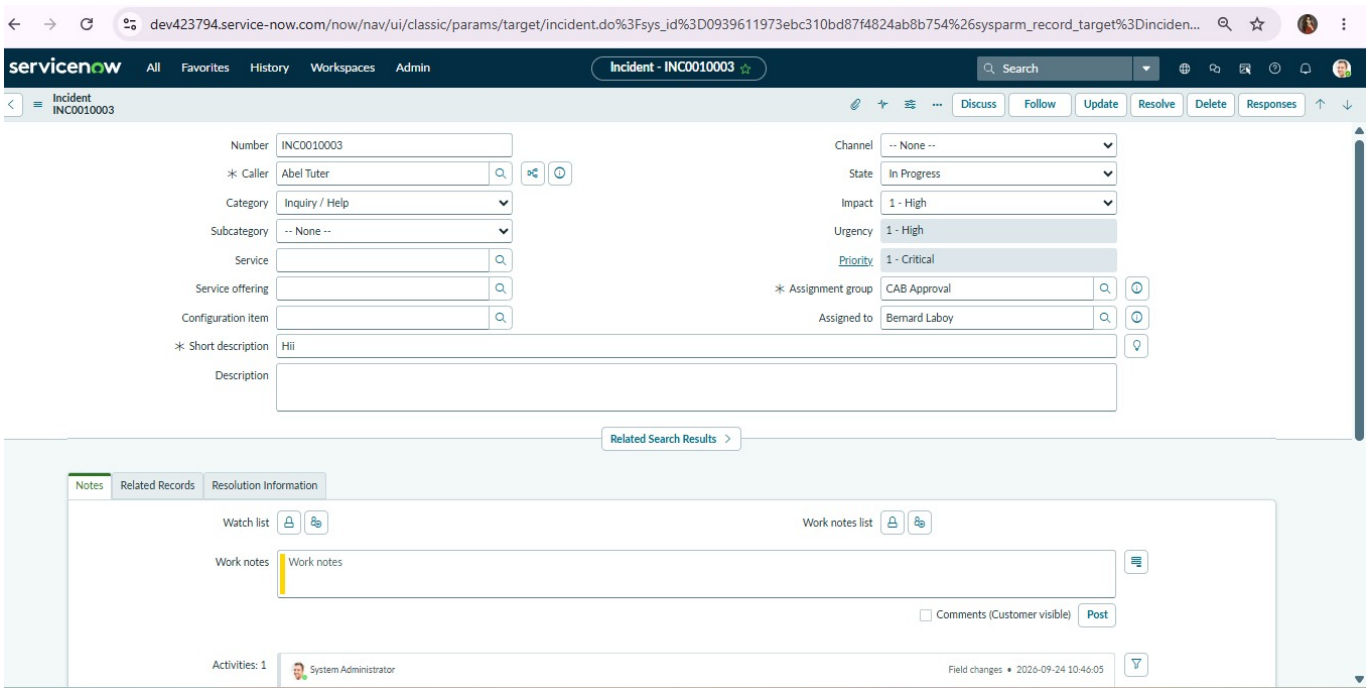

## Testing Summary

The implemented UI Policy and Client Script were checked against the planned behavior. The observed results matched the intended configuration.

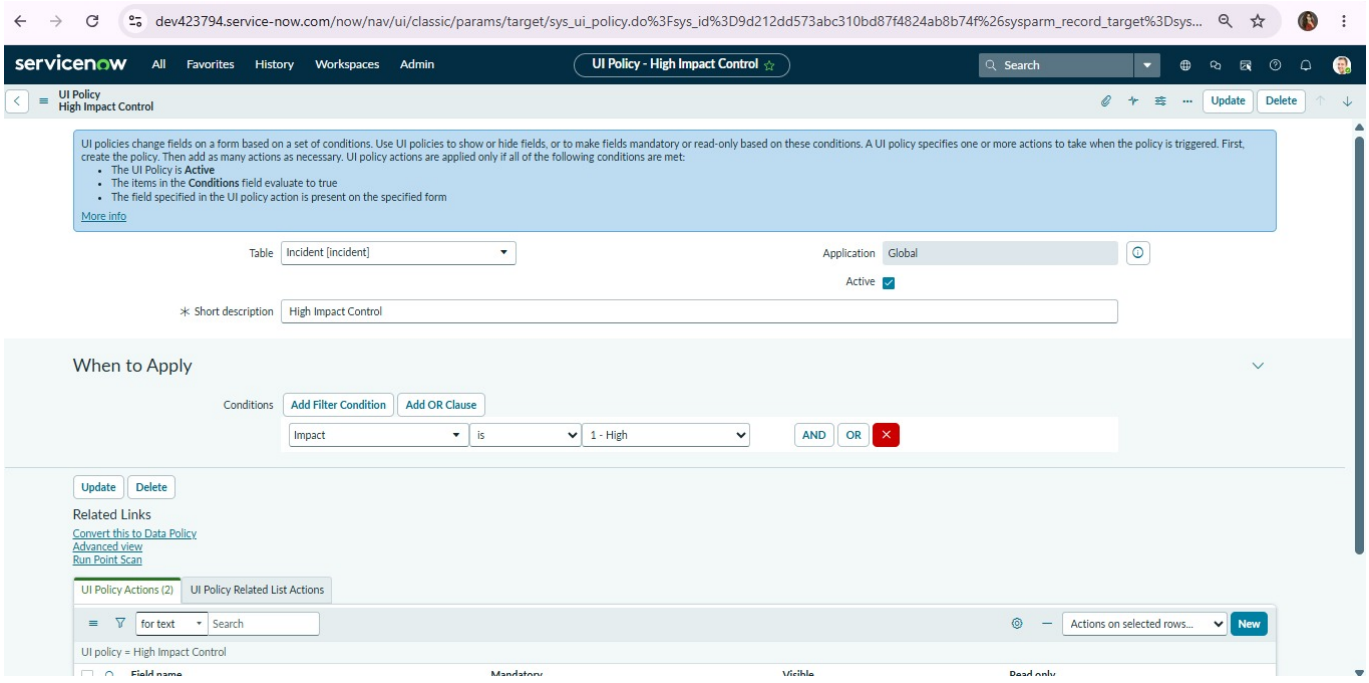

## Conclusion

Testing confirms that the main implemented controls operate as expected in the ServiceNow Incident environment.

# Screenshot 1 – Incident record (INC0010003)

# Screenshot 2 – UI Policy: High Impact Control

# Screenshot 3 – Client Script: Prevent state change via list edit
