7. Project Documentation

Implement Client Script & UI Policy (Incident)

Project Overview

'Implement Client Script & UI Policy (Incident)' is a ServiceNow project that applies UI Policy and Client Script concepts to the Incident table.

Key Features

• High Impact UI Policy
• Urgency mandatory control
• Assignment Group visibility control
• onCellEdit Client Script
• State update validation
• Incident testing and evidence collection

Tools Used

ServiceNow, ServiceNow Incident module, Client Scripts, UI Policies, JavaScript and GitHub.

Usage Flow

Open ServiceNow → Open Incident → Enter or modify Incident data → System checks configured conditions → UI Policy or Client Script applies → User receives validation when required.

Project Benefits

The configuration helps maintain consistent Incident data, reduces incorrect field updates and demonstrates automation using ServiceNow administration and scripting features.

Documentation Structure

The project is documented through phase-wise files covering ideation, requirements, design, planning, development, testing, documentation and demonstration.
