# 8. Project Demonstration

Implement Client Script & UI Policy (Incident)

## Demonstration Objective

To demonstrate the complete working flow of the ServiceNow project and show the implemented UI Policy and Client Script.

## Demo Flow

1. Introduce project title and purpose.
2. Open ServiceNow and show the Incident area.
3. Show the High Impact Control UI Policy.
4. Show the UI Policy Actions.
5. Show the Prevent state change via list edit Client Script.
6. Open Incident INC0010003.
7. Show relevant Incident values.
8. Demonstrate the configured behavior.
9. Show testing result.
10. Conclude with project benefits.

## Video Content

The demonstration video should include screen recording with voice-over, project name, purpose, benefits, execution steps and final output.

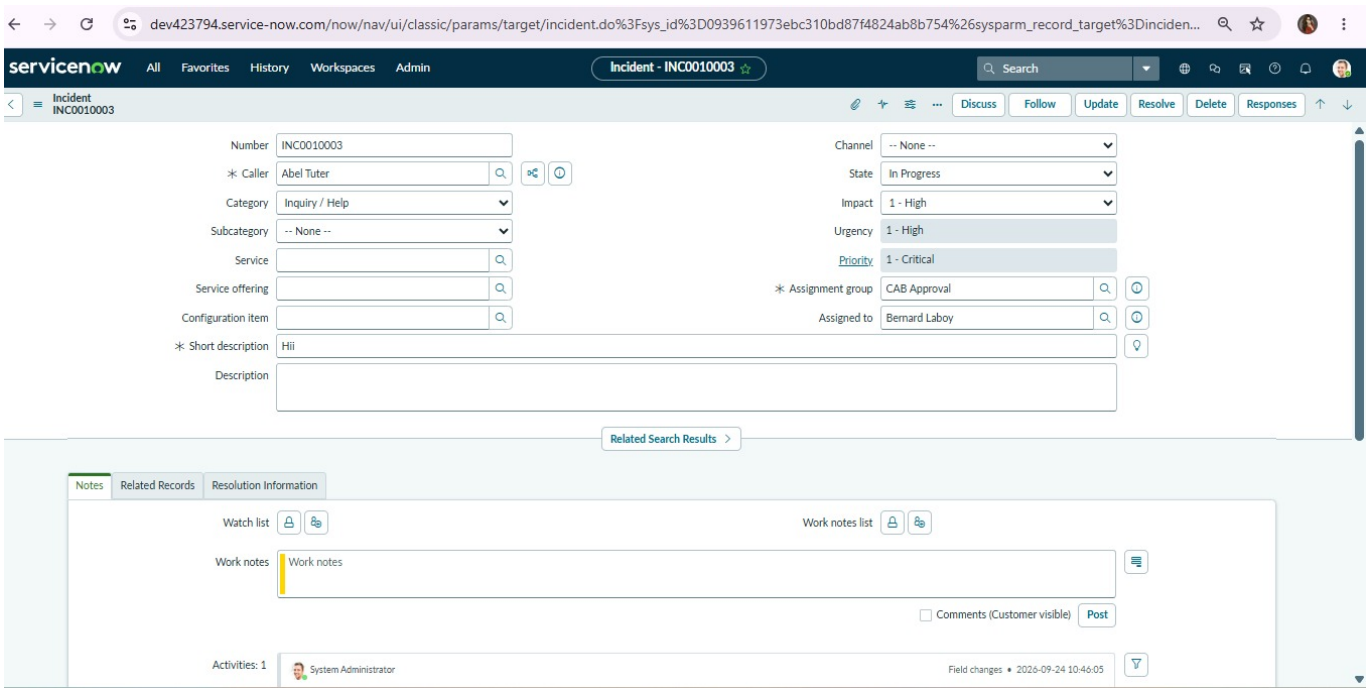

## Final Output

A working ServiceNow Incident configuration demonstrating UI Policy and Client Script based automation and validation.

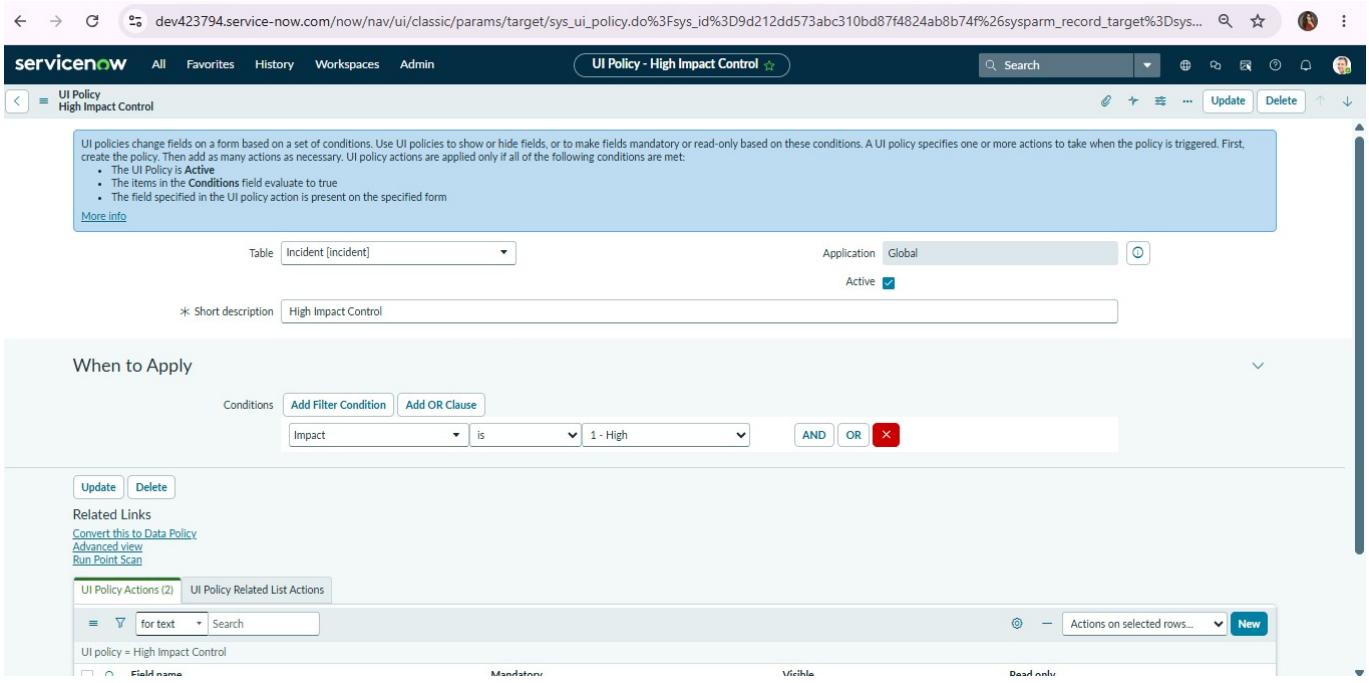

## Submission

Upload the demonstration PDF to GitHub and include the public demonstration video link as required by the project submission instructions.
